

# WORLD MOBILE CONGRESS

A Program of "Mission 2020" R&D Plan

**JULY 5 - 7, 2006**  
**MUNICH, GERMANY**

## WMC'2006 / B3G Int'l Summit

(c) Delson Group

**RESEARCH FOR MOBILE LIFESTYLE OF NEXT DECADE - A CALL FOR ACTION**

### WELCOME TO 2006 WORLD MOBILE CONGRESS, MUNICH, 5-7 JULY 2006

The number of subscribers for mobile communications has increased much faster than predicted, particularly for terrestrial use. In the year 2000 the number of mobile subscribers was around 400 million worldwide and for the year 2010 more than 1.8 billion mobile subscribers are anticipated. The wireless mobile industry is rapidly transitioning from proprietary architecture to more flexible, cost effective open architecture systems. This transition is creating interesting challenges for developers, manufacturers, integrators, operators and end-users as they wrestle with complexities of open wireless systems. Therefore, this important annual conference, driven by industrial leaders and famous scientists and technologists, is very timely and valuable for those who are involved in the research and development of next generation wireless and mobile communications.

--- Prof. Willie W. Lu, Founder and Technical Chairman of WMC'2006

#### SPONSORSHIP & EXHIBITION

Position yourself as an industry leader, and increase the visibility of your products and services through sponsorship and exhibition.
